Cupallo wall brass

Brass and handblown recycled glass

Cupallo wall joins the classic collection reinventing Cupallo's essence. Solid brass and recycled handblown glass differ in proportions in this wall version. The recycled handblown glass process encapsulates tiny air bubbles in the glass, transforming the light that shines through into a spectacle of multiple reflections. Cupallo's wall brass disk shines through the glass, not only reinforcing its light effect but warming its tone with its metal reflection surface. Both elements work together as diffusers of shine and a charming light.

Both elements work together as diffusers of shine and a charming light.

Cupallo wall copper

Copper and handblown recycled glass

Cupallo wall joins the classic collection reinventing Cupallo's essence. Solid copper and recycled handblown glass differ in proportions in this wall version. The recycled handblown glass process encapsulates tiny air bubbles in the glass, transforming the light that shines through into a spectacle of multiple reflections. Cupallo's wall copper disk shines through the glass, not only reinforcing its light effect but warming its tone with its metal reflection surface. Both elements work together as diffusers of shine and a charming light.

Transforming the light
that shines through
into a spectacle of
multiple reflections.

Cupallo wall chrome

Chrome and handblown recycled glass Cupallo wall joins the classic collection reinventing Cupallo's essence. Chrome and recycled handblown glass differ in proportions in this wall version. The recycled handblown glass process encapsulates tiny air bubbles in the glass, transforming the light that shines through into a spectacle of multiple reflections. Cupallo's wall chrome disk shines through the glass, not only reinforcing its light effect but warming its tone with its metal reflection surface. Both elements work together as diffusers of shine and a charming light.

The perfect proportions
into a new arrangement
for wall.
