

Geometry in its purest form. Origo embodies opposite essences mirroring volcanic rock and an opal glass diffuser. The volcanic rock sphere has been formed by a handmade process, enhancing its aesthetic value. The soft light shines onto the texture of the volcanic rock, revealing its relief and contour. Sober and logical, both materials create a relationship between light and composition. Origo as a chandelier becomes a cosmic installation of warm, dancing lights. Its compact size works as an architecture miniature of stacking materials.
